Open-Source Software Strategy

Key deliverables that makes imtac open-source strategy a big success

- > **Mature methodology**
- > **Recognized technical expertise**
- > **Guaranteed long term support**

Open source software provides real-world solutions to your real world needs

- > End to end control
- > Reduced costs
- > Technical independence from software publishers
- > Repositioning of integration and interoperability

Open source software provides effective responses to

- > Reliability and performance
- > Long-term sustainability
- > Blended source approach

Why Open Source

Least Cost

Licenses & upgrades

Interoperability

Open standards

Rapid deployment

Modify and use

Re-usability

Base code available

Freedom

No Vendor Lock-in,
No vendor road map,
Resource availability

Security

Transparency of code &
fast bug fixes by community

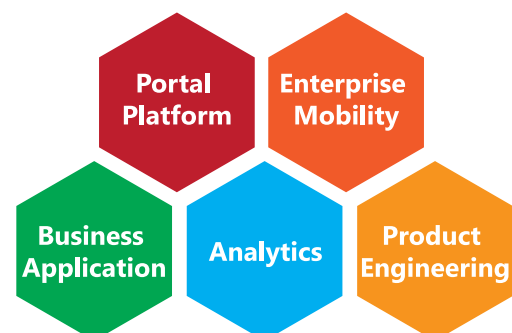

Tested Quality

Community tested,
Technical superiority

Open Source Solution Portfolio

- > imtac draws on many years of experience in software technology and solutions integration, and has created center of excellence to leverage that experience for open-source software implementation
- > As a strategic partner for open source projects, Imtac offers a full range of solutions to support your open-source system needs today and in the futures
